At a cursory glance there would  
not seem any obvious targets  
except to step out S & E  
from DDH # 2 & P.D.H 31 and 32.

This would fall in the area  
between the Ross Shewing & the  
S. shewing (Map 5c). Stables  
of Johnson Camp. I don't see  
any reasonable mag, I.P. or  
geomem targets as such.

Meserole don't appear to have drilled  
their best I.P., west of Tachet Cr.  
- Is it all volcanics, Grey? ??

We might consider it as  
a long-shot wildcat drill program  
if we could get it dirt cheap  
& nothing better comes along.
