Dear Bill,

Ted has completed L O-24 to date. Some lines are incomplete because of deep snow. Only line to do at this time because of snow is L28. Anything above this is snow, glacier & cliffs. Ted feels he should extend lines 0, 4, 8 + 12 to SW + NE to complete picture as far as possible at this time.

This should all be completed in 3 to 4 days. Maps are incomplete and cannot be sent down at this time.

Unless otherwise directed Ted will move to Anom. #1 in 3 to 5 days. Messages can be directed through Fred's radio

John.
