LITHOLOGY DESCRIPTION

1	Basaltic andesite	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
2	Andesite	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
3	Basalt	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
4	Basaltic andesite	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
5	Andesite	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
6	Basalt	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
7	Basaltic andesite	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
8	Andesite	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
9	Basalt	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
10	Basaltic andesite	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
10a	Andesite	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
10b	Basalt	Blocky, massive, dark grey to black, fine to medium grained, with some cherty nodules.
