(TO BE COMPLETED IN TRIPLICATE)

Dear George:

Attached is a sketch of the claim groups in the Anuk River area showing the Pan and adjoining claims.

You will note that Hudson Bay are holding their ground, That the Bell are doing the same, and that Conwest have lapsed most of their ground except those claims immediately adjacent to the H.B. ground.

Our plan to work in the Iskut area hinged on getting an American helicopter, and the chances of that are now very slim. Recently, Asbestos applied to use their Canadian machine in Alaska and were refused permission. It is therefore, very doubtful if the Cdn companies will allow an American machine in B.C.

I spoke to John Deleen, American Metals, regarding activity in the Stikine area. He told me that he had been on all the claim groups in the Porcupine, Scud area and the Anuk and had not seen anything very interesting. He said he had examined the S.S. Copper group owned by Highland Bell and had turned it down. He also has discarded his own ground east of the H.B. claims on Canyon Ck. I understand Charlie Brown did some stripping on the Bell ground- this latter from the staff in Vancouver. Have not seen the bald-headed little man this season.

You might be able to check some of this information with Deleen's boss in Toronto or even with Phil Jenny, who visited the showings held by the Bell and American Metals, last year.

It still stands that if I get in that country with a helicopter, I'll try and get on the Pan group (or at least hover over the ice field...)

Encl: Sketch map

Regards,
Roderick Macrae

(TO BE COMPLETED IN TRIPLICATE)

Vangorda- border- Ronka Loop recce:

The E.M. team report they are over half completed on the reconnaissance work on the east side of Vangorda. Since there was thirty miles laid out, they must have fanned their collective tails. Estimate they will be finished by the 16th Aug and on the 17th will move to Jake. They had some minor trouble with a connector on the earphone plug-in that was repaired locally.

Jake.

Slim reports geo-chemsurvey completed. Line cutting will be completed by the coming weekend ready for the Mag and E.M. survey. He is doubtful if the Packsack drill will operate there but he has work for it so we have beefed up the water-supply system by renting a small pump from Boyles. The nearest water is some six hundred feet from the proposed drill site.

Movement Woodchuck and Boyles Equip.

All Boyles equipment that was moved down Pelly is now in Whitehorse. The Woodchuck is at Hootalinqua. The engine went U/S and required a new cylinder for the engine- which Emil Forest robbed the Loon motor to supply.

Willison Prospecting team.

Now working south of the Pelly on one of the lakes tributary to the Pelly. He will complete his work north of the Tay by the end of the month.

Aird Prospecting Team

This team will be in the Tombstone- Eagle Creek area until the end of the month.

General.

Examined the old Union Mine, Annie Lake Whitehorse District. Heavy arsenopyrite, low silver and gold values. It is unattractive because of narrow widths.

Stikine area.

The Pan group-owned by Triana, from a preliminary check of information available is not suffering from lack of work. Conwest have lapsed the adjoining claims, hold only

a block of sixteen adjoining H.B. ground. The latter company are maintaining their ground. Amco field Engr- John Deleen tells me he has been on the Anuk and has not seen anything of interest on the Triana ground. Incidentally, he has drilled his own showing and did not find anything of value. Highland Bell have maintained their ground south of Scott Simpson Mtn. The four claims on the anuk owned by Malicky and Meason lapsed or lapse early September. There is no record of claims staked in the Iskut or its tributaries, except a group in the vicinity of the Bronson Mine Grants. I surveyed the claim staking situation in all the Northern half of B.C. and with the exception of the Conwest Asbestos ground, only small groups of 8 to 16 claims have been recorded.

In B.C. generally, there is little prospecting activity. Noranda have closed their Yreka operation and the work around Greenwood. Highland Valley is the most active camp in Southern B.C. There is some work going on in the Kamloops copper belt. The Kootenays are shaking in the boots over the proposed American tariff proposals against Lead and Zinc. Conwest's Tootsie Lake base metal show is a zinc property, underground on the first level opened up. They are just starting a second level, but Connell says they will not be able to do sufficient work to get the required information to assess before the next option payment is due, which, I gather is a sizable one. I flew to Vancouver with him. Caley No 2 has been turned over to Cassiar for development. He has plans to boost the tonnage at Keno Hill.

I note your letter and Ted Jackas regarding the Gal group and have advised the stakers of the intention.

Regards,

Rod Macrae

WR

Dear Rod:

George Radisics advises that due to pressure of work on his Arctic claims, he cannot spare Lomer D'Aigle to examine his claims on the SCUD RIVER, northern B.C. He is faced with paying \$3200.00 assessment work this fall to keep the claims in good standing for another year and wants you to advise him on this. I told him you planned to look into the exploration picture in this area shortly and may make a trip there. If so, would you be able to examine his ground while in the area, or if not you could probably round up enough reliable information for him to make a decision whether it is worth holding onto. He has written you also in this regard.

Yours very truly,

E.O. Chisholm

MEMORANDUM

TORONTO May 11th, 1956

TO: MR. C. L. COLEMAN
FROM: MR. G. M. RADISICS
SUBJECT: BRITISH COLUMBIA PROJECT

I have just received a letter from Mr. Wilfred McKinnon advising me that he succeeded in staking 32 claims in close proximity to the Hudson Bay Mining & Smelting Company claim group protecting that Company's discovery made last fall. I am attaching herewith sketch showing location of the Pan 1-32 claims, which are the ones staked by McKinnon for Triana Exploration Limited. As you will note from the sketch, a group of mining claims staked, I believe, by Gordon Dixon, and sold to Conwest Exploration, lies between the Hudson Bay group and our claims.

Mr. McKinnon advises that the claims have been recorded at Telegraph Creek and transferred to myself, however, I have not as yet received Mr. McKinnon's accounts and the transfer forms. These should reach Toronto in the very near future. Meanwhile, I am executing bills of sale in blank, as well as declarations of trust, attesting that I am holding these claims on behalf of Triana Exploration Limited.

MEMORANDUM

TO: MR. C. L. COLEMAN
FROM: G. M. RADISICS
SUBJECT: EXPLORATION IN BRITISH COLUMBIA

I have completed an agreement with Mr. W. McKinnon of Whitehorse under the terms of which he undertakes to stake, record and transfer to myself, in trust for the Exploration Company now being formed, 32 mining claims tying on or as close as physically possible to the discovery made by prospectors of the Hudson Bay Mining & Smelting Company Limited in the general Iskut River Area of British Columbia.

McKinnon is to receive the sum of \$100 per claim staked, recorded and transferred, plus actual expenses incurred in staking, which I consider is a reasonable figure taking into consideration the location and the exceedingly rugged and difficult terrain involved. The staking, barring unforeseen difficulties, should be completed within the next three or four weeks.

A copy of the agreement between McKinnon and myself has been forwarded to Mr. Andrew for his records. I shall keep you posted regarding progress being made in this undertaking.
