Hudson Bay mining: Scud

River Claims

Aug 23 1956

I understand that Hudson Bay are now diamond drilling on their Scud River property near which Triana Exploration holds a group of 32 mineral claims, soon to be examined and visited by our Mr. D'Aigle. I further understand that core recovery to date has been very poor but that they feel the source material of the numerous high-grade copper bearing floats which led to their acquiring this property by staking has been located and is a sheared granite porphyry.

It was decided to call off the staking party which was to attempt to get into this area, as Rod MacRae, Neil Sprague's man, had just returned from there and staked claims in the location. He reported the area was very high and would be covered with snow until the end of July. As Radisic has claims in the area it was not considered economic to acquire more ground in the area by flying in from Whitehorse to Helicopter.

#### Scud River Staking.

It was decided to call off the staking party which was to attempt to get into this area, as Rod MacRae, Karl Springer's man, had just returned from there and staked claims in the location. He reported the area was very high and would be covered with snow until the end of July. As Radisics has claims in the area it was not considered economic to acquire more ground in the area by flying in from Whitehorse to Helicopter.

RE: SCUD RIVER STAKING

1049  
RMB

WAL

Ivor Mast phoned from Juneau today and stated that the air transport board would not give him approval to use the helicopter out of Juneau on the grounds that a Canadian helicopter was now available out of Whitehorse. The service was not available from Whitehorse when Mast left.

I advised him to return to Whitehorse and use the Whitehorse helicopter if possible. If it appeared when he returned to Whitehorse that other prospectors were in the Scud area he is to call the expedition off. The estimated cost of using the helicopter out of Whitehorse would be around \$3,000 for the job. Staking expenses would be on top of this.

Dear Ivor:

Enclosed find map of recent staking on Scud River for  
 Conwest and Triana Exploration.

I note that the south and east sides of the Hudson Bay  
 ground are open. This appears to be the best side and if we can  
 get ground tying on here by staking, I would be interested. Perhaps  
 you could check with McKinnon quietly and find out if this is still  
 open. If so and the helicopter is available, we should stake a two-  
 claim deep group around this side of H. B. Please advise when you  
 find out if this is possible. Probably Thompson or Leeming would  
 be on hand to do this.

Yours very truly,

Encl.

Dear Al:

Enclosed find location map of ~~Sand~~<sup>CVB</sup>-Stikine River, etc. You will note the group of 42 claims on the headwaters of the ~~Sand~~ Creek. I believe these must be the ones referred to by McKinnon that Hudson Bay staked.

I would like you to organize an expedition to tie on a group of 32 claims on possible strike; 16 on either end if possible. I have no information outside of this so you will have to use your own judgment as to what the strike is; probably along the length of the mountain chain. McKinnon tells me he may go in shortly on his own to stake and sell to all comers.

It looks like the best way to go in would be up the ~~Sand~~<sup>SCVD-R.</sup>. Possibly there has been some people in since this map was printed but I think the chances of getting ground close in are still good.

A little library research has yielded the following information. The nearest geological map is Map 310A, centre sheet, Stikine River Area by F. A. Kerr, issued 1935. Related report, Summary Report, Part A. 1928 and Preliminary Report of Stikine River Area, B. C. by F. A. Kerr.

I am pretty certain that map and report is in our Whitehorse office amongst the others. I got it this summer when you were to go in the area with Walter Malicky. If he is available, perhaps he would be a good boy to take along as a staker.

Best regards for now and I hope you have recovered sufficiently from your visit to undertake this.

Yours sincerely,

EOC:JK  
Encl.
