Murder or lucky Train:

Area of ls. interbedded with calcite, luffs and breccias.
No Cp by some clay contacts between ls and volcanics in
follows traces. + shear zones in them. In places patches
of native Au black tellurides

Sept 10/1913

Valdes (Quadrant) visited by Donald Forbes of BC DM.

Crossed by Coast Range / Vanc. Is. greenstones

Irregular bodies of ls occur in "diabase" c.r., up to several acres.

ls cut by dykes striking NW (map) + underlain by
diabase. ls prob remnants of once larger deposit. Some holes.

Deposit: small bodies Po & Py with Cp, Py, some Au, usually in
the ls. close to diabase or granite. Small Qv in the
diabase with tellurides (prob sylvanite) + Au.

Stampede: 6 mi W Crater Bay

Q ledge toward 150' with Cp Py Po

2000' from granite contact

2-5' thick but pinching to nothing at times.

best one: Au 0.3 Ag 0.8 Cu 1.6%

few N of vein in stockwork Qv in diabase.

(small value)

Gold Exp.

NW of Stampede

~~On shore of small lake.~~

Several open cuts in siliceous schist between diabase
& ls. with a little Cp in places. 300 yds W of granite
contact

Bird

NW of Gold Exp.

On shore of small lake

5 cuts on diabase/ls contact. NW dip SW
some Cp + Py - Q stringers carry Au

Sppl: 0.2 Au 0.2 Ag.

Cordot

NW of Bird

3' of Po in tunnel (110' SW from ls NW)

Sppl: Au .2 Ag .2 Cu .9.

Cormorant 40' shaft on Po i ls 2½ - 4' wide
