

TR 93-3 Geology  
 DRH Aug/03

Stimily fractured zone  
 around gonyg fault  
 plane

Typical F Porphyry Rock  
 Consist of 10-20mm complex  
 plagioclase phenos and 5-10mm  
 orthoclase phenos in a medium  
 grained pink quartz phos groundmass.  
 Bz phenos average 2mm and only  
 comprise about 4% of the rock.
