G2649	0.3	7
G2650	1.5	35

NTS 93F/3
SCALE 1:5000

- EOCENE (?)**
- 12 Aphanitic quartz eye dyke
 - 9 Rhyolite Kapor porphyry
 - 10 Altered porphyritic andesitic
 - 9A Hydrothermal breccia
 - 9B Rhyolite - locally flow banded and spherulitic
 - 7 Purple Kapor - quartz porphyritic flow

- 6 Aphanitic ash tuff
- 5 Gray - green lithic crystal tuff
- 4 Gray - maroon crystal tuff
- 3 a - Andesite, b - andesitic conglomerate
- EOCENE OR OLDER (?)**
- 2 Light gray - green felsic volcanic
- 1 Volcanic conglomerate (andesite, spilitic, and granodiorite boulders)

- LEGEND**
- Drill hole, inclined (showing horizontal projection)
 - Contact, inferred
 - Outcrops
 - /// Talus
 - Quartz rubble
 - ↘ Strike and dip
 - Flow banding
 - Fracture attitude
 - Vein attitude
 - ~ Fault - inferred
 - Trend of texture, mineral lamination
 - ↘ Plunge and trend of gophers
 - Axial trend of small outcrops

- - - - - Secondary trail
- ⊙ Camp
- Helicopter pad
- Claim lines
