

Trout Project - epithermal Au, Ag NTS 93F/10 821946

- acquired by Kerr Addison July 29 / 84.

- brecciated + silicified andesites of upper Cret - Tertiary
Ootsa Lake Group - best assays 0.58 opt Au / 5m
0.24 opt Au / 7m.

- work done L/C
1984, 85 soils
mag / IP
trenching
drilling 1198 m - 11 holes NQ
767m R/C

1987 option to Welcome North. geol, soils, trenching 367m in 13 holes RC

- location 60 km SW of Vanderhoof.

- 6 claims - 99 units expiry Aug 12 - Nov 13, incl.

- Discovery Zone - silicified andesite bx ; banded chalcedonic
qtz / adularia.

- native Au + argentite ^{in veins} 0.57 opt / 5m trench.

DDH - 85-01 - 0.1 opt Au / 6.1m.

area of significant mineralization over an area 100m x 50m
- pipe lines 40 x 80 m -

- 1990 property optioned to Goldrite -

drilled 9 HQ holes 1050m

testing Discovery + Camp Zones

4 holes → + mineralized trachyte bx
N of Swanson Creek.

Camp Zone - 200 m NW of Discovery zone. - drusy qtz
Anomalous Au - R/C drilling 0.85g/t Au / 7m.
