This is a 16-claim group designated Poi 1-16, located on the Fulton River 35 miles east of Smithers. The claims were staked on November 28th on an aeromagnetic anomaly detected during the course of a reconnaissance flight on January 14th, 1965. The anomaly appears to occur in Hazleton sediments. The accounting code designation BC-15 has been assigned to this group. The staking and recording data will be forwarded in due course.

William M. Sirola.
