To.....W. M. Sirola.....From.....P. M. Kavanagh.....

Subject.....Geochemical Samples.....Date.....March 4th, 1966.....

Morrison Lake Sp., Babine Area, B.C.

Attached is the original and one copy of a set of geochemical assay samples which, upon enquiry, we have found out were submitted by Clyde Smith. We are assuming that you have not been sent any copies of the results directly.

Attached also is a copy of the bill which I wish that you would code and return here for payment.

In future when you submit geochem samples for assay from your office I wish that you would give clear instructions to the assay company that the original of the assay results and the bill should be submitted to your office directly and only a copy submitted to us here. As when rock samples are submitted for assay it would be helpful for us when you are submitting geochem samples to send us information about the samples being submitted so that when we would receive the copy of the results we would be able to study them intelligently. I realise of course that in the case of geochem samples we ultimately need to receive a sketch from you showing their location and results and your interpretation of them in order to have a full appreciation of them.
