LEGEND		SYMBOLS	
CRETACEOUS		▣	Shafts
▣	Quartz Monzonite.	>	Adits
PRECAMBRIAN		---	Contact defined, inferred.
▣	Creston Fm: massive and laminated, green and gray, argillaceous quartzite and quartzite, green argillite.	○	Outcrop
▣	Middle Aldridge Fm: mainly med. to thick bedded, quartzitic wacke and quartz wacke (turbidite beds), interbedded rusty weathering, laminated, thin bedded wacke. (interturbidite beds)	/	Bedding, Shearing.
▣	Intraformational conglomerate and conglomeratic quartzitic wacke.	⊃	Trenches
▣	Tourmalinized.	⊙	Diamond drill hole
▣	Very massive quartzitic wacke and quartz wacke (channel fill sand?)	○	Soil Anomalies
▣	Gabbro sills & dykes.	▣	Zn > 181 ppm
○	Marker bed matched.	▣	Pb > 44 ppm
○	Marker bed unmatched.	●	V-TEM CONDUCTION
—	Mineralized quartz veins Pb, Zn, Ag, FeS, As.	6	NUMBER OF CHANNELS
