OCT 28 1991

Dear Colin,

My name is Glen Rodgers. I am partnered with Craig Kennedy, Peter Klewchuk and Lloyd Morgan all of the Cranbrook area. We hold a combined 3% NSR on the Darlin claims near St. Mary Lake. We also hold an interest in the David property, upper Moyie River area (a mesothermal gold bearing shear containing approximately 50,000 tons of 0.4oz/t Au). As a group we hold many other mineral properties in the East Kootenays. In the vicinity of the Darlin property we also hold the Gus, Jared, Doc and Roddy claims all of which contain soil geochem and/or geophysical anomalies.

My reason for writing to you is to express our interest in working for Minnova either directly or on contract to help prove up a mine in the St. Mary Valley area. We would also welcome any opportunity to discuss with you other properties of merit which we hold in the Kootenays.

We are a group of dedicated explorationists each with his own talents.

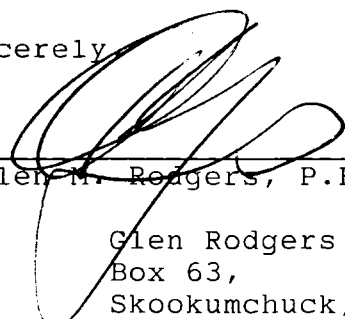

Peter Klewchuk has a masters degree (UBC) in geology and is one of the most knowledgeable geologists around on Aldridge and Sullivan geology. He has worked 13 years for Cominco and has been contracting for the last five years.

Craig Kennedy is a prospector with an excellent understanding of local geological processes and remarkable powers of observation. He is credited with finding the David, Darlin and other new discoveries in the area.

Lloyd Morgan is an old time prospector who knows the area, the showings and whose specialty is property acquisition and assessment work.

As for myself, I have a BSc. in geological engineering (U.Man.) and have been contracting for the last 10 years. My expertise lies as a competent field geologist (mapping, drill program management and reports) as well as managing staking, linecutting, geochem and geophysical contracts.

-Sincerely,

(Glen M. Rodgers, P.Eng.)
