MEMORANDUM

TORONTO November 7th, 1958

TO: MR. W. S. ROW

FROM: MR. G. M. RADISICS

SUBJECT: YALE LEAD & ZINC MINES

Additional information concerning this property's Slocan B.C. operation is at hand and that is to the effect that the downward continuation of the ore from the ninth, namely, the lowest level worked at the mine, has been confirmed by six diamond drill holes completed to date. If these drill results are representative of the grade of the ore body, this lower extension of the ore appears to be the best grade ever encountered in this operation.

MEMORANDUM

TORONTO November 6th, 1958

TO: MR. W. S. ROW
FROM: MR. G. M. RADISICS
SUBJECT: YALE LEAD AND ZINC MINES

In checking into the recent strength on the Toronto Stock Exchange of Yale Lead and Zinc, I find that the reason for the appreciation of this Company's stock is due to the fact that they have recently acquired claim holdings adjoining the high grade molybdenite deposit under development by interests associated with Mr. J. J. Rankin. No further details concerning Yale's claim holdings are available at this moment.
