

LEGEND

- TERTIARY**
(Eocene or Later)
- 4 CORVELL INTRUSIVES**
- a) Lamprophyre dikes, diabase dikes various compositions
 - b) Breccia pipe
 - c) Perphyritic quartz monzonite
 - d) Biotite - augite monzonite
- CRETACEOUS**
(Lower ?)
- 5 NELSON INTRUSIVES**
- a) Lamprophyre dike biotite, quartz, plagioclase porphyritic (Contains some assimilated host material)
 - b) Rhyolite porphyrite
 - c) Felspar porphyrite

- JURASSIC**
(Middle and Upper)
- 2 HALL SEDIMENTARY FORMATION**
- a) Argillite
 - b) Sandstone
 - c) Sandstone/Argillite intercalated
 - d) Quartz pebble conglomerate
 - e) Micro Schist
 - f) Garnet diopside skarn
 - g) Impure garnet skarn
- (Lower Jurassic)**
- 1 ELISE (ROSSLAND) VOLCANICS**
- a) Basalt/Andesite flow
 - b) Tuff
 - c) Lapilli Tuff
 - d) Agglomerate
