KERR ADDISON MINES LIMITED

(FOR INTER-OFFICE USE ONLY)

AUG 3 1976

To D. A. Lowrie From W. M. Sirola

Subject Juniper Mines Copper-Molybdenum Prospect Date 30th July 1976

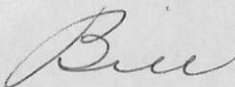

Peachland Area, B.C.

823264

You will recall when we were in John Hajek's camp N.E. of Revelstoke, a Volkswaggon pulled up and discharged a great quantity of rock samples which the driver spread on the ground. That driver was Ian Sutherland who is working in some kind of concert with Mel DeQuadros, who is the taller of the two gentlemen who got lost. Shortly after we left the Revelstoke area, John Hajek and the two East Indian geologists came to a parting of the ways, and I had a call from Mel DeQuadros the other day regarding the property from which the samples were taken.

The enclosed map indicates that the property extends south westward from Glen Lake a distance of approximately 3 miles. DeQuadros said he had personally visited the property and had seen separate outcrops, one of which contained .9%Cu over a 400' length of the outcrop. The second occurrence contained 1% MoS₂. He probably meant to say .09%Cu and .1%MoS₂.

Back in 1967 a small company called Juniper Mines conducted geological, geochemical and geophysical surveys, together with 15 percussion drill holes totalling 2,575'. DeQuadros had the results of this work with him and these results may be summarised by saying that the geochemical results were essentially negative and the MoS₂ values in the drill holes were in the order of .025%. The samples which were alleged to contain chalcopyrite were found to contain tarnished pyrite only. I have to conclude from all of this that DeQuadros is naive and lacking in practical field experience, rather than someone who is deliverately attempting to mislead. For the time being at least, there is nothing but some patchy quartz-sericite alteration which would be even mildly interesting. Unless DeQuadros is able to come up with some positive evidence, no further interest is indicated.

W.M. Sirola
