KERR ADDISON GOLD MINES LTD.
Per.....

Dear Sir:

I have a gold property 2 miles south of Lavington and 11 miles east of Vernon. This property was owned and developed by the Kalamalka Mining Co. from 1934 to 1938.

Between 1937 and 1944 7,162 tons of ore was shipped to the Trail Smelter. Reports on this property can be found in the Minister of Mines Ann. Repts. 1897, 1934, 1935, 1937, 1938, 1940, 1941, 1942. I also have mine and assay maps of this property.

The ore body is 3ft. to 12ft. in width and has been drifted on 340 ft. in the No.1 level and 250ft. in the No.2 level. There is 80 ft. between the two levels and 80 ft. from No.1 level to the surface. A 35 ft. shaft was sunk on the vein in the No.2 tunnel, with a 40 ft. drift at the bottom of the shaft.

The ore body lies in a granite-diorite plug which is appr. 1500ft. in length with the strike of the vein. The width of this plug is unknown.

If you are interested in this property, would you please let me know at your earliest convenience.

Yours truly,

A. S. Bennett

We regret that we cannot undertake any action at the present time since our men are fully engaged in the field. However, we hope to review the situation sometime in September, but we do not have an opportunity to do so before then.

Yours very truly,

p.p. William M. Sirola.
