Mr. Alex Davidson,
Corporation Falconbridge Copper,
6415 - 64th Street,
DELTA, British Columbia
V4K 4E2

Dear Alex:

Thank you for sending the two (2) drill sections for the Chu Chua zone as well as for the Dighem map in the Rea Gold area.

Enclosed are the INPUT profiles near the RG-8 and L-100 zones. Questor had recent photography while the Dighem mosaic was an older vintage so that correlating the results was difficult. The profiles that I am sending you are thought to be close to your outlined zones.

Dip direction is toward the northeast.

The INPUT results over the entire Rea Gold property are very interesting in that a number of long, formational trends as well as short isolated targets have been located. The backgrounds are excellent ~15ppm resulting in well defined anomalies.

It is hoped that Corporation Falconbridge Copper will re-consider and possibly purchase some of this data, certainly data over the Rea Gold area as I am quite sure that additional targets have been found.

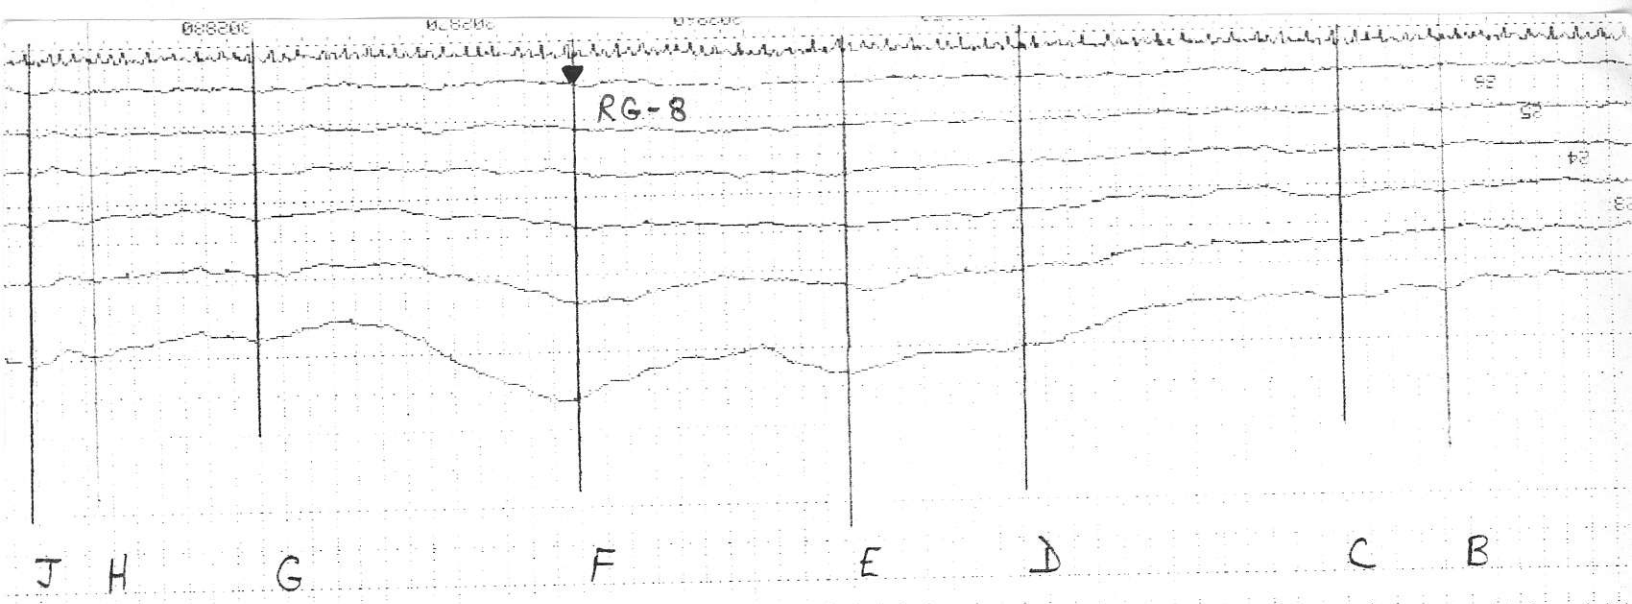

Again thank you for the information.

Yours sincerely,
QUESTOR SURVEYS LIMITED

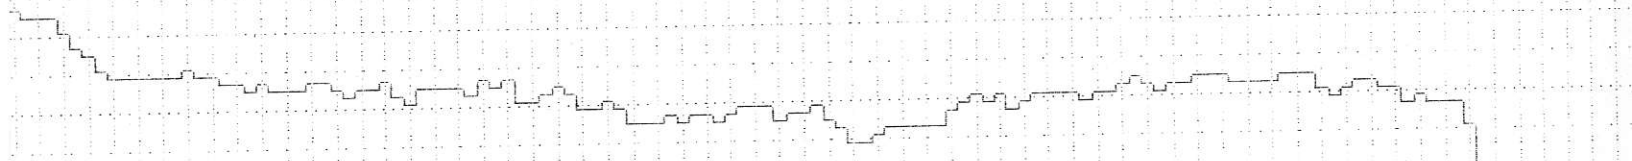

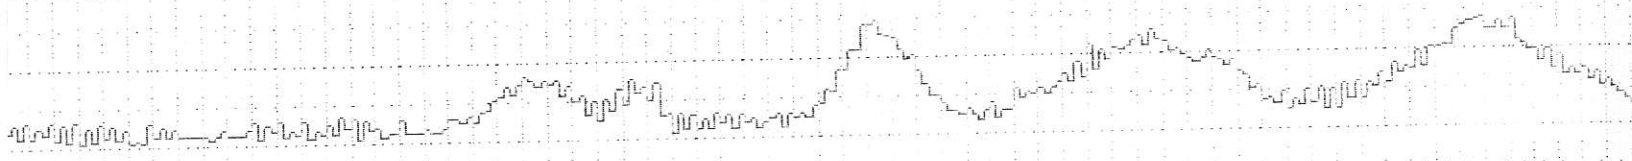

Bob
