Mr. William A. Cameron,
1 Needham Drive,
Revelstoke, B.C.

Dear Bill:

Herewith the results of the sampling that we did of the tungsten showings on April 24, 1981. It is possible that samples 3501 and 3502 are a little low because of the oxidation of the surface at the sample site.

The showings are certainly worthy of a lot more work and it now appears that Northair will give the deposits a real going over.

It was a very genuine pleasure to meet Ruby and yourself as well as Fran and Tony Jenkins.

Best regards,

Yours sincerely,

Bill

W.M. Sirola,
Regional Exploration Manager.
