Dear Mr. Doyle:

82-M

We have reviewed the potential of the Rexspar area, including your ground and it is our decision not to consider exploration in that region for the time being at least.

We very much appreciate the time and effort you have expended in trying to equip us with the necessary information on which to proceed.

With the current strong interest in uranium properties, we trust that you will find someone who will take an active interest in your property.

Best regards.

Yours very truly,

*W. M. Sirola*
