Lone Pine
White Knight Am File 03967

- Lot 1081

- 7.2 km West of Osyoos Lake on the
International Boundary

- Lat 4900.0' Long 11932.8

- Metals: Ag

- No Production

The deposit is in Kuga Syenite near
the contact of the Triassic-aged Kalou
Seds. It consists of a series of veins, all
connected within the syenite. The veins
are exposed in a 200 m long adit. Veins
have flat dip, max. width 5 cm

Min - py, chalc, galena, argentite

old #1; Walt 29-30; Vol; Joe
- 8.8 km West of Osoyos near
Richter Lake
Lat 4904.8 Long 11934.1
Metals Ag, Cu, Mo

Proposed Geol

- S. with $2/3$ → Huges Syenite
N. eastern → Granodiorite & gneissite.
- separated by a northwest trending
band of Hebron quartzite & quartz
mica schist.
 - The quartzite & adjacent quartz diorite
contain micr. dis. py. dolco, &
hornite, adjacent to the quartz
& calcic veins.
