

Nov 5 More snow overnight - a good 4" in Greenwood.
Let's hope the highway can make it!

Greg & Mary splitting.

Chris drawing sections / finishing drill summaries 11-13.

Check on drill situation. → SFA.

Gary plowed road

Nov 6 Greg to Grand Forks to pick up chainsaw.

Mary split car.

Greg & Mary buck up trees at drill sites.

Chris - logging TM 91-14

Water tank on way up - dripping by late afternoon (after 3 days)

Duffels stolen last night (after 5).

Nov 7 Greg / Mary finish bucking up trees on pad TM 91-14.

Greg - take saw back to town.

Mary splitting.

Chris log TM 91-14 (time sheet is faxed)

Nov 4 Another F.V. day! * Snow. 2-3 inches in Greenwood.

Mary doing drill sum hole 12, flying, wait for Paul Witton - brought him down to our shack

Greg finish splitting / shipping hole 11.

Paul Witton around for an hour.

Shipped off laptop computer (heat problem??)

Phone line down in afternoon til night.

Chin - finish hole 13, package laptop, talk to Paul, deal with drill problems. ?

- ① Leo comes by in early AM - His old chains don't fit - has to go to Grand Forks when a pre order set is ready.
- ② Even chained up he can't do the job.
- ③ Darwin comes up to see if he can do it - says he can but road needs to be graded in a couple of places and a round trip will take about 2 hrs. 10,000 gals = 10 hrs & need 24 hr water trucks. Cam says go for it.
- ④ Adit will not hold enough water - only ~4000-6000 gallons. & ground so rocky, can't build sump & need water tank.
- ⑤ Ken Taylor's tank holds 5000 gal but no wheels or skids. Need high-up to move - Larry Scott. Distler got in contact with him said he could do it tomorrow (the 5th) (If this doesn't work Leo is working on contingency plan in Osageos). Problem is the tank will have to be moved once when TM91-15 (P23) is finished \Rightarrow 3 truck trips ??

Nov Result: No drilling done today!

(Signed Les. Invoice for Oct 21-31. ⁵⁴)

Oct 31

Mary logging TM 91-12.

Chris logging TM 91-13, finish 91-11

Greg split core.

Night shift got cat stuck filling water hole, moon before got moving again. Hauled drill the long way to TM 91-19.

- didn't make ~~get~~ great set up for the hole.

- Leo back hauling water → started late but will work til ~12:00.

Nov 1

Month 2. starts (and a shitty start it is!).

Greg out locating, labelling holes.

Mary logging, Chris logging.

Ran out of H₂O at 4 am.

Drillers ready to go at 10 AM. (Leo has standby)

Sump not holding water well - took some left over plastic up in the pm.

Leo's radiator spring a leak had another (Dowin) guy up - both trucks had to work to keep sumps full.

- how is this to be charged.

Drillers have problems with their pump being in backup

→ Don't know how much time was lost.

Nov 2

Chris log Cor, Mary log Cor til noon, work on sections.

Greg to town to buy plastic, split core.

Drillers ran out of water on night shift (Nov 2 am) again ~3:00.

Computer problems with the laptop again send it back on Monday

Nov 3

Shut down TM 91-14 at 400' (on Nov 3 2:30 am) - shut down early, ran out of H₂O again. Leo's truck not up there?!

Greg/Mary split core.

Chris - Finish drill summary TM 91-11, log TM 91-13.

Drill set up, not enough water - no night shift, Leo will be here in AM.

Oct. 27 Greg & Chris set up TM 91-13.

Greg split core

Chris finish logging TM 91-10

Mary log log, to sections, drill hole summary

Not much core from night shift - elevation on water line caused breakages - then had problems with freezing.

Damen still hauling H₂O.

Oct 28. 2:30 AM SHUT down TM 91-12 @ 319' - 9' early - water lines frozen again. Spend rest of night picking up, moving water line.

Mary log log.

Greg split 1st start renovation.

Chris log do more searching for the N-S strike.

Drillers did not work night shift.

Oct. 29. Chris out in field with drillers for a while, logging
Mary - log log, draw up TM 91-10 sections, splitting.
Greg finish renovation, splitting.

Drillers still setting up on TM 91-13 should start around noon - shift change fairly on days.

Damen still hauling H₂O.

Oct 30 Mary / Greg split core. Damen still hauling H₂O.

Shut down TM 91-13 at ~8:00pm.

Chris logging, drill sum.

Oct 21 Leo figures he + friend can help us in H₂O.
Greg / Mary splitting.
Chris run around morning, write drill form for 91-7.
Leo - 13, charge 10; show Mary proglog.

Oct 22 Drillers working on TM 91-9.
Leo around - 13 hrs charge 10 - wants \$65 - screws fan.
Mary Progloging,
Greg Splitting
Chris logging.

Oct 23. Shut TM 91-9 @ 3:30 AM. Drill setup on P11
by 9:00 AM and start drilling.
Go over drill invoice.
Greg split case
Mary log TM 91-9
Chris finish TM 91-8.

Oct 24 Mary logging, Chris logging, Greg splitting
Shut down TM 91-10 @ 5:30. Setup / Start TM 91-11
(P10); Dawn? takes over for Leo. - will bill Leo
who'll present us with one invoice.

Oct 25 Mary & Chris logged, Greg split.
Drillers on TM 91-11.

Oct 26 Shut down TM 91-11 @ ~ 487^(?) - Broken down on move.
Mary working on drill summary, split case, change
log TM 91-6.
Greg splitting.
Chris looking for trail to south end for most of day.
- minor logging.

Oct 18

Greg got plaster for sump

Mary splitting core

Greg set up core racks

Chris up & down hill a lot. - took Bob Knight / John
shaved roads - will take short road, built sumps

- misunderstanding about travel time

- water truck vandalized, not ready

- Drillers want to P-9 dig sumps, gather water line

- no night shift.

Oct 19

Mary split core

Greg finish core racks

Chris finish logging TM 91-7 - Did Sun 91-6, start 91-7
drafted section for 91-7. Start looking for Temp
water truck.

Bob King got alternator but apparently not starter - may not
be available until Monday

- Fred calling Larry Scott, and Furr haven't heard
back yet.; George is out.

Oct 20

Told drillers to no more Sunday fill get water truck

- Got Leo B. agreed to run water on Monday (21)
for \$65/day - discuss price for longer term

Greg / Mary split core.

Chris - run around after drillers, meet Leo, start
looking at 91-8.

Oct 21

Drillers start drilling @ 10:00

Phoned B. Knight that water situation resolved & that
it wasn't needed

Oct 13 Sunday.

- ~~Shut down~~ Log some of TM 91-6
- Mary logging TM 91-5
- Greg splitting core TM 91-1 Add. Samples

Oct 14 Shut down TM 91-6 @ 4:30 AM @ 502'
Mary logging TM 91-5
Greg splitting TM 91-2 Add Samples.
Chris ~~finish~~ log TM 91-6 split ~~TM~~

Oct 15 Mary log TM 91-5
Greg finish split on TM 91-2 - ship samples
Chris finish TM 91-6, start 7.
Shut down TM 91-7 @ 4/6'

Oct 16 CIM to hunt for drill water.
Greg finish splitting TM 91-3
Chris cutting trees etc.
Drill TM 91-8 land + blocking
Greg to town - groceries, relax, start building racks
Mary finish logging hole, start splitting again.

Oct 17 Mary split core
Greg build core racks
Chris - some logging, lots of running around
Shut down TM 91-8 @ 385'
Drillers start coiling waterline.

986-0960

Oct. 9: Greg drill holes for core rack

Mary split core

Chris log core., set up EDM TM 91-5

End TM 91-4 @ 506' - instead of 525' =

Oct 10: Put in bits for TM 91-6

Mary split core

Greg finish drilling holes for core rack, split core

Chris log, change flat, talk to Cam

Oct. 11. Show + Tell Jan, Dave, Herb, George.

Greg + Mary split core.

Chris finish logging hole 4

Drill Hole TM 5 unilaterally ended by Don.

- after 6th bit was shot.

- left some casing + 12" old shoes down so can go down again if necessary (at Atlas' cost!!)

- let them set themselves up check at night.

- Cat stuck, can't move, no night shift

Oct. 12 Finish splitting TM 91-4

Finish Marlang up additional samples for TM 91-1 to 3

Go over TM 91-5 with Mary - she'll log with my assistance.

Drill moved - setup at 95-97° (5-7 off section)

- Greg got rest of lumber for core racks - still no rebar.

- told Don, Minnova would cover cost of 2 bits

- Don in better mood

But also told him there's good chance we'll have to go back to it - this cost.

Summary of Days Activities.

Oct. 6.

Greg Split Core ; Send Sample TM 91-1, TM 91-2
Mary travel to Greenwood. ← No slow car problems
Chris go over drill holes with Cam.

Chris log Core.

Greg redraw some sections @ 1:250

Shut down TM 91-3 @ 400' ; Next hole on steep
side slope. Cat broke cable & chain several times getting
drill in place.

Wrote up Drill Sum TM 91-1

Troubled Up printer.

Can't Use fax machine. -

Oct 7.

Greg finish redrawing necessary sections

Greg to town buy bunch of stuff

Chris log core. - Finished logging TM 91-3. - finished staining.

* Our account with hardware store not in YET!
so couldn't get core rack materials.

Greg dymo taping.

Fax works fine. - try to fax printer.

Night Shift Drill Broken Down.

Oct. 8

Mary arrives

Greg do the core thing

Drill still broken down - day shift - should be a night shift

Log Core

George Stewart accident. (Billen wife)

Dave, Jan, George to show up on Friday.
