

CORPORATION FALCONBRIDGE COPPER

MEMORANDUM

DATE: September 9, 1986
TO: A. J. Davidson
COPIES TO: D. H. Watkins
DE FROM: I. D. Pirie
SUJET SUBJECT: Rea Gold - Silver Zone Drill Proposal

824411

With the aim of establishing an order of magnitude for the size of the Silver Zone deposit(s), the following drill program is proposed. Refer to the long section for locations.

P1 (RG-77)	L94+00, 6+20NE	-60°	200m
P2 (RG-78)	L94+00, 6+20NE	-90°	250m
P3 (RG-79)	L95+00, 6+70NE	-64°	265m
P4 (RG-80)	L95+00, 6+70NE	-90°	300m
P5 (RG-81)	L96+00, 7+15NE	-90°	330m
P6 (RG-82)	to be established	approx.	<u>300m</u>
	Total		1645m

Holes P1-P5 will all be in the upper drill area and will enable the south-eastern extent of the deposit to be better established. P6 should be on section 97+00, but due to the unsuccessful attempt to drill RG-76 on that section further ground examination will have to be undertaken.

It is also proposed that the up dip projection of the deposit to surface be explored by trenching. Approximately 6-8 trenches will be required between Lines 100 and 98 or so. It is intended to use the same cat that makes our drill roads so the trenching may start as early as next week.
