Attention: P. Nairn McConnachie

Dear Sir:

Your data herewith attached regarding Radioactive Black Sands -  
Bugaboo Area, British Columbia has been reviewed.

The situation is an interesting one, when considered during a  
healthy economic uranium climate.

However, the tenor of mineralization indicated still is not  
sufficient to justify development at this time.

Thank you for your interest and submission.

Yours very truly,

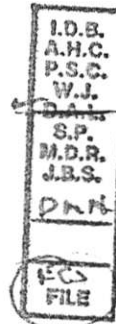

KERR ADDISON MINES LIMITED

D. M. Hendrick,  
Chief Geologist, Exploration.

June 18th, 1976

Attention: Mr. Dale Hendrik

Dear Sirs:

Further to your conversations with our Mr. Aronec, we are pleased to enclose for your review, copies of recent reports which we have had undertaken on the radioactive black sands deposits which are located upon our property in British Columbia.

Previous drill reports on the deposits have indicated a lower reasonable potential of 25,000,000 cubic yards and a probable 37,000,000 cubic yards.

You will note that the reports would indicate that it is now timely to consider placing this property into production.

To this end, we are seeking an arrangement with a company which would have the resources to bring the property to commercial production on completion of the various recommendations.

We would be pleased to hear from you as to your possible interest in such a venture.

Yours truly,

P. Nairn McConnachie
