To G. M. Hogg From W. M. Sirola

Subject WESTERN MINES OUTSIDE EXPLORATION BARRIERE LAKE AREA, B. C. (82N) Date October 11, 1973

Handwritten routing slip with initials: VWSR, J.H.S., P.M.K., G.M.H., B.C.B., I.D.B., M.D.R., J.H.F., and a circled E.C.I.

In the last two days I have had one inquiry from Dave Lowrie and one from you regarding the location and nature of exploration being done by Western Mines. I suggested to Dave that he contact Jerry Wood since Jerry is a Director of Western Mines and while Jerry did not know precisely which property was being worked on, Dave got the impression that it was the Royal Canadian Ventures property located on Harper Creek approximately twenty miles east of the town of Barriere. The 1968 Lode Metals of B. C. speaks only of soil sampling on the property.

It is also possible that the property in question is the Renning group located on the southeast side of East Barriere Lake at the mouth of Deadfall Creek. This location is twenty-two miles from Barriere. Mineralization on the property consists of chalcopryrite and sphalerite in meta-sedimentary rocks. In 1968 an E.M. survey of twenty-six claims was made, 1500 feet of bulldozer trenching was completed and one 150 foot hole was diamond drilled.

Dave Lowrie still thinks that Noranda's ^{Harper} Harbour Creek property is the best in the area (5 million tons of 0.4% copper) and said that he has not seen anything very exciting elsewhere. In itself this does not mean too much but does reflect the results of work done by Noranda in that general area.

Handwritten note: Harper
