NINE LAKE GROUP - TRENCH SAMPLING (82F-16)

September 4, 1973

Enclosed herewith sample chits Nos. 404 to 499 inclusive and Nos. 800 to 867 inclusive for all rock samples taken during the 1973 trenching program on the Nine Lake claims.

Also enclosed are Coast Eldridge's assay certificates showing results of samples Nos. 404 - 499 inclusive, Nos. 800 - 820 inclusive, and 827 to 834 inclusive.

Assaying on samples Nos. 821 to 826 inclusive and Nos. 835 to 867 inclusive is in progress. The latter batch is reported to contain samples which show higher than 0.05%  $WO_3$ . Coast Eldridge lab is trying other methods of analysis to obtain a more precise determination.

I have selected four small groups of samples (pulp) which will be check-assayed by Vangeochem Laboratories.
