

Information on TIC TOC claims:

Cess. Report. 2552.

Memor. 296. P. 146-50. # 36 45 + 57.

1969. G.E.M. Report Spaskum. Production
143 tons. Avg. averaged. 10.89 g.

upon browsing a downtown Co.'s reports I
read reports covering chrome, Tungsten,
Sphal. Vanadium, fluor spar. Cadmium, manganese,
scheelite, pavelite, spessalt, ilmenite, titanium.

Mo. & uninit:

Now it is obvious, that its not likely these
reports stick with the TIC TOC area only;
but contain work over in that general
area.

I have copies of assays that I took on various
visits to the property. & will attempt to
find them.
