MEMORANDUM

DATE: November 26, 1984

TO: A. J. Davidson

COPIES TO:

FROM: Ian Pirie

SUBJECT: MARKHAM RESOURCES CLAIMS, ADAMS LAKE 82L/13E

825410

Don Summers, president of Markham Resources, has contacted us to see if we are interested in their claim group located 4 or 5 km west of the south end of Adams Lake. The claims have had some trenching and soil survey performed on them. Mineralization takes the form of high grade Pb, Zn, Ag veins. No Au assays have been done.

Little is known of the geology of the group. Their consultants report (NTS file) mentions metasediments and limestones in the area. It lies off the bottom of Preto's map, and, by projection, may not be in the Eagle Bay formation.

I have expressed our interest in doing a property exam in the spring. The claims are in good standing until late 1985.

Ian Pirie
