Dear Jim:

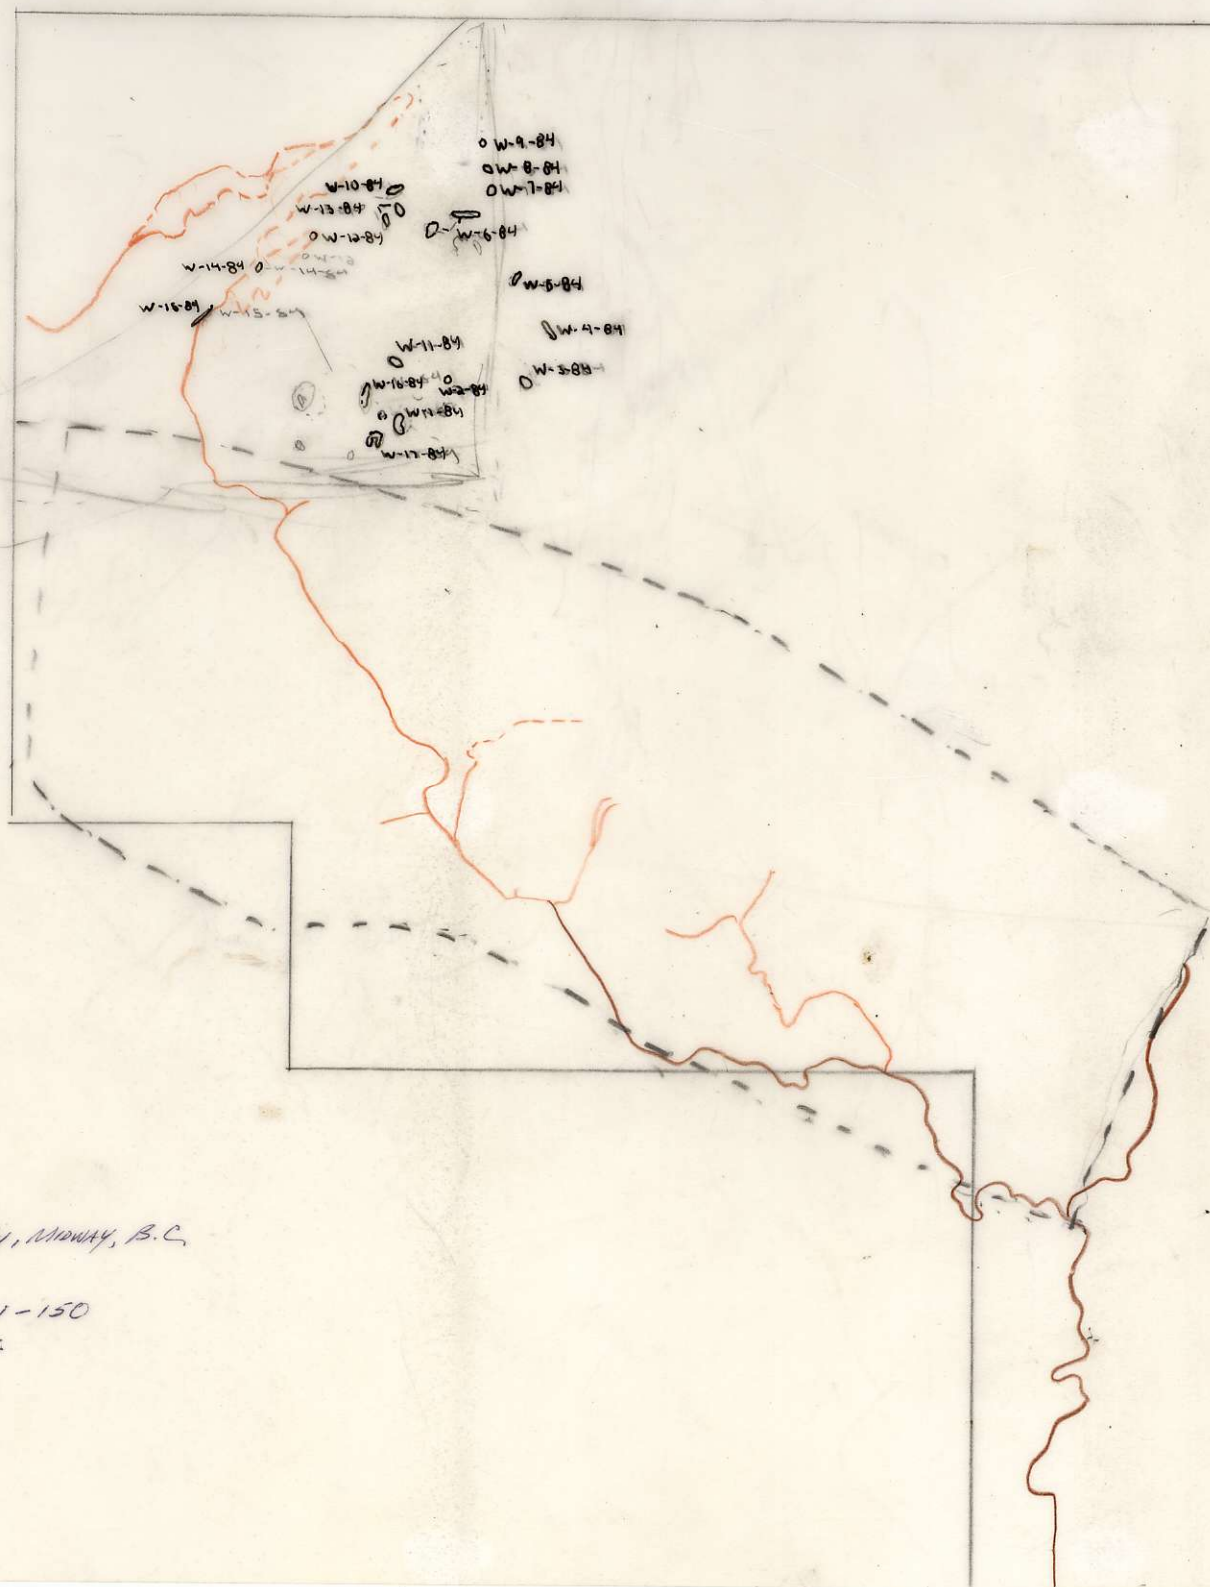

Enclosed are the two air photos which we borrowed from your office last fall when our crew was mapping/prospecting the Rainbow Group of claims.

Our report on the work done was forwarded to Kettle River Resources via Loomis Courier on March 29/85. These note that I did not describe in detail the rocks and geology covering the entire claim group. Although we prospecting & mapped ^{all} the claims we did not study the other rocks in detail. Our main effort was concentrated on investigating the serpentinite unit, especially any occurrence of quartz veins for precious metal content.

The note that I took the liberty of using some of Red's and your mapping & incorporated into our mapping of the area. The east end of the plotted grid is not tied into a recognizable point on the ground; therefore there will be inaccuracies on the line plots.

I thank you for your invaluable assistance and so kindly give our love to meet you again soon to thank you personally.
Yours truly,
Fredson
