	17.00 - 22.00	16.4	0.013	0.60	0.03	1.01	0.32

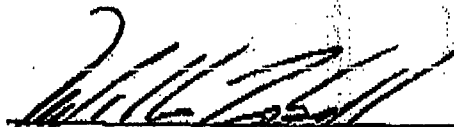

The nine holes tested sulphide mineralization hosted in the Black Dog Zone. Holes RR90-1, -2 and -3 were drilled from the same site at -45°, -60° and -75° respectively. Holes RR90-4, -5, and -6 were drilled from a common setup which was located approximately 150 feet to the east. These holes were inclined at -45°, -60°, and -90°. Holes RR90-7, -8, and -9 were drilled at similar respective dips from a site approximately 100 feet west of the first drill setup. All inclined holes were drilled at an Azimuth of 047°.

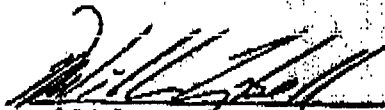

Eurus and Thios are equal Joint Venture partners and can earn a 100% interest in the property from Prime Resources Group Inc. ("Prime") by jointly making a cash payment of \$500,000 to Prime on March 13, 1994 and incurring a total of \$1.0 million in expenditures also by March 13, 1994.

Eurus and Thios have contracted with Prime Explorations Ltd., a division of Prime Equities Inc., to provide management and consulting services for the Rock & Roll Project.
