To.....D.M. Hendrick.....From.....Jim W. Campbell

Subject.....Husky Oil Submissions.....Date.....November 12, 1974

Dick Janes who heads the Husky Oils Mineral section in Calgary, advised me that the Husky Oil people are getting out of mineral exploration and he handed me a summary of what they have done to date and are willing to present us with more data if we are interested in probably entering an agreement.

Some of the properties lie outside my area in the Yukon and B.C. I would suggest the Foster River Zinc properties look interesting but Husky Oil and Candel Oil will hold a meeting with Eric Partridge to decide a deal if we decide to proceed further into studying this property. Apparently the nature of the agreement with Partridge calls for this arrangement. Janes suggested this property especially the Sito east showing was worth more follow-up. He also suggested further work on the Mink Zinc prospect.

If we want to contact Dick the address is

R.H. Janes,
 Mineral Section,
 Husky Oil Operations Ltd.,
 815 Sixth St. S.W.,
 Calgary, Alberta.

Respectfully Submitted,

J. W. Campbell

Jim W. Campbell.

JWC/r

*Will wait and see
D.M.H.*

*The Foster River area is an
 interesting and unusual one. However,
 I do not think there is much
 point in dealing through Husky.
 JWC Nov 28/74.*

HUSKY MINERAL PROSPECTS

□ Husky Mineral Properties

MINERAL PROPERTY

NAME: Cum Claims.

LOCATION: Moresby Island, Queen Charlotte Islands, B. C.
NTS 103G. 4

CLAIMS, PERMITS,
RECORD NOS. &
EXPIRY DATES: Cum Claims 1 to 24
May, 197? - Field work is to be applied for
assessment purposes.

HUSKY GROSS ACRES: 960

HUSKY NET ACRES: 960

OWNERSHIP, PARTNERS,
OR OPTIONORS: Husky 100% but subject to a 5% net profit
interest payable to locator.

OPERATOR: Husky Oil Operations Ltd.

HISTORY:
Staked on basis of pyrite mineralization in andesite
and presence of magnetic high.

WORK DONE:
Airborne magnetometer survey, reconnaissance
geochemical survey of drainages, and prospecting.

HUSKY EXPENDITURE TO DATE:
Assume 25% of Yakoun Project, approx. \$15,000.

GEOLOGICAL SUMMARY:
Claims straddle magnetic high located within andesitic volcanics of Yakoun
Formation (Jurassic). Drainages show no anomalous values for copper, moly-
bdenum, silver or zinc. Pyritic andesite flows are exposed along the seashore
in McCoy Cove.
