

CINDLA

2/7/96

RAD + IMregardless of grade \rightarrow key

Concerns * Processing, How refractory is it;

1. NITRIC ACID OXID'N OF S⁻ ARSENO PROCESS
 - tricky, control iron and marcasite/pyrite can't do with S-

2. AUTO CLAVE ? COST ? get
 consultant.

SIMONS GROUP

Brian Netherery

3. BUGS ?

KILBORN - did

Mercur

Roy Bradburn comments pilot
 plant too small

- Non friable
