Dear John;

Thank you for the opportunity to review the data on your 100% wholly owned block south of the SUMAC J.V. The proposal is extremely interesting and is our type of program.

However the location of the project area and attendant lack of infrastructure effectively precludes our participation in the project. However we may be able to consider this project further if by our participation we could also earn an interest in the Kutcho deposits themselves. If you think this latter proposal is possible please give me a call.

Best of luck with your projects.

Yours truly,

Alex J. Davidson
Exploration Manager
