Dear Luca:

Thanks for allowing Maggie to show me around the Britannia pits; it was an interesting visit. In one of the pits, I observed what I suspect are flattened silicified pillows with selvages of pyrite-sphalerite. This would suggest that the "dacite" in the pit area may be silicified mafic volcanics.

Please extend my thanks to Maggie for taking the time to show me around.

Yours sincerely,

CORPORATION FALCONBRIDGE COPPER

Paul W. A. Severin,
Senior Exploration Geologist
