DATE: October 21, 1986  
TO: A.J. Davidson  
COPIES TO: D.H. Watkins  
DE FROM: C.M. Burge  
SUJET SUBJECT: Further to Proposed Diamond Drilling - Britannia

---

826141

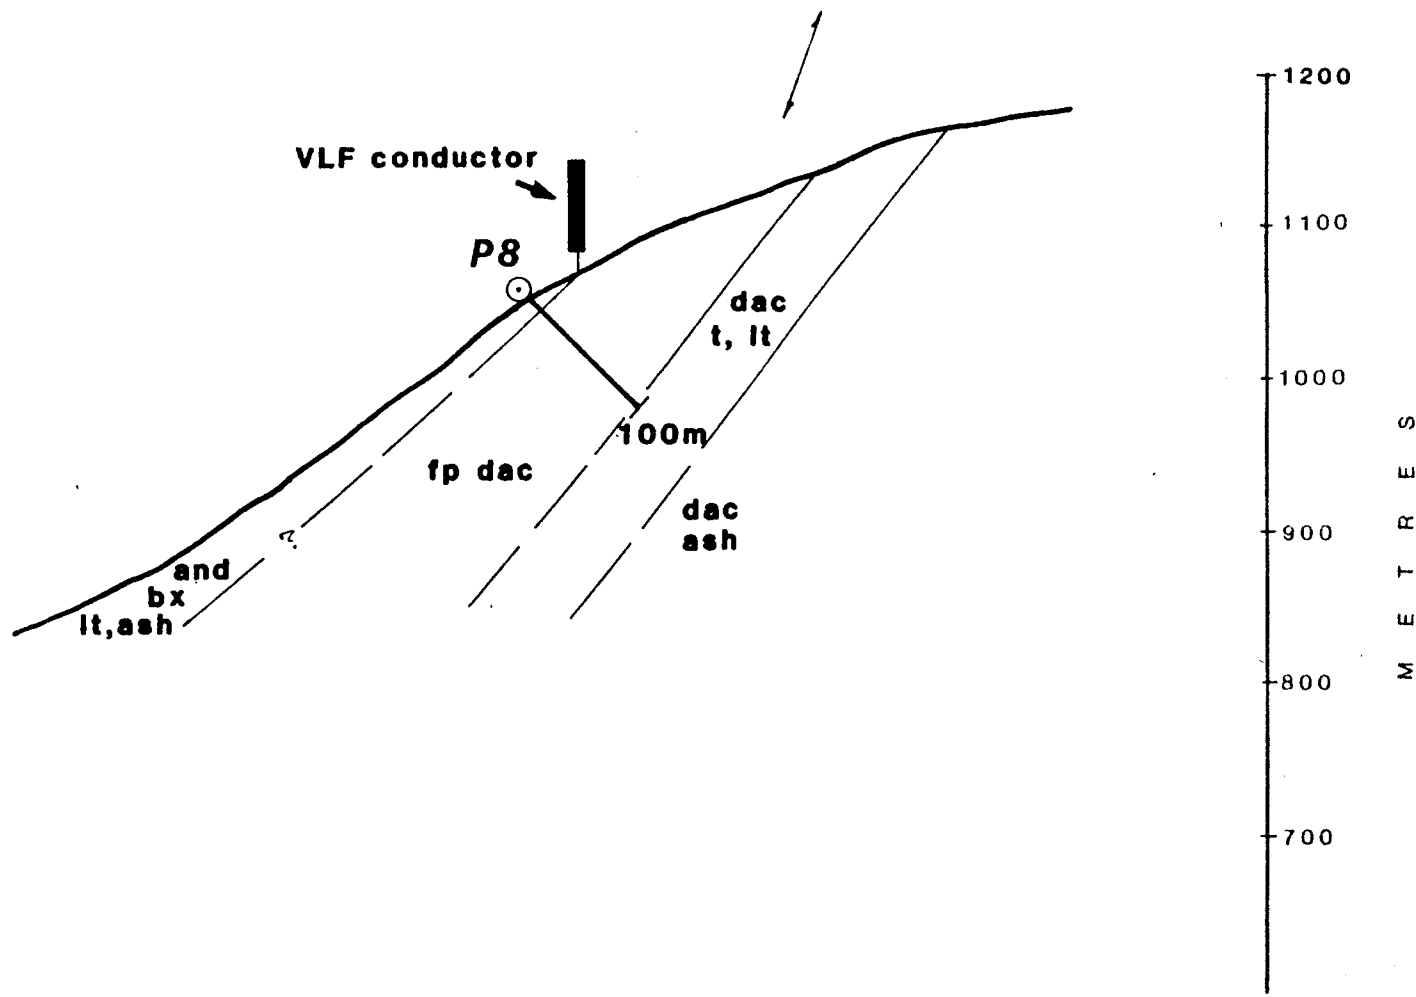

The recently obtained filtered VLF data for Furry Creek grid shows the strongest anomalous zone to be located on L11W at 4+75N. An eighth hole is proposed to test this conductor and the andesite - dacite dome contact. P8 conveniently can be drilled from the road and hopefully a 100 meter hole would be sufficient. Perhaps this hole should be given higher priority.

HOLE NO.	LENGTH (m)	AZIMUTH	DIP	EASTING	NORTHING	COST
P8	100	043°	45°	11+00W	4+40N	\$9,500

A handwritten signature in black ink, appearing to be "C.M. Burge". The signature is stylized and somewhat cursive.
