Attention: Credric Steele

Dear Cedric;

We are herein returning a copy of MPH's report on you "Mike" property near Cowichan Lake, Vancouver Island.

We have reviewed the data in detail and we feel that the property has both merit and potential. Unfortunately, due to other projects and priorities we are unable to make an offer to participate in the further exploration of the property at this time.

I wish to thank you for sending us the report and allowing us this opportunity. We are very much interested in reviewing for participation other properties that ICD may have or acquire on Vancouver Island.

Exploration should be underway on Heather by mid May and good results are expected.

Hope to get together with you soon.

Yours truly,

A. J. Davidson  
Exploration Manager  
Western Canada
