

North Fork

826610

JUNE 7/85 92H/12

Talk to Dave Watkins of Corp. Falconbridge Copper (CFC) regarding North Fork property. He will send a summary report of work done and what next stage exploration will be. He thinks that holes drill by Orbex was drilled in wrong place. They have geochem signature in the area of the showing (small). Next stage will be to do minor geophysical work and drill a couple of holes.

CFC owns the property and do not need to do work at the moment, but they will like to work on it now instead of waiting for budget for the property. They are looking for a joint venture partner to spend \$100,000 to get a 45% interest in the property. After that ~~the~~ expenditures will be on a prorated basis. They want to be the operator.

Tor Burtup

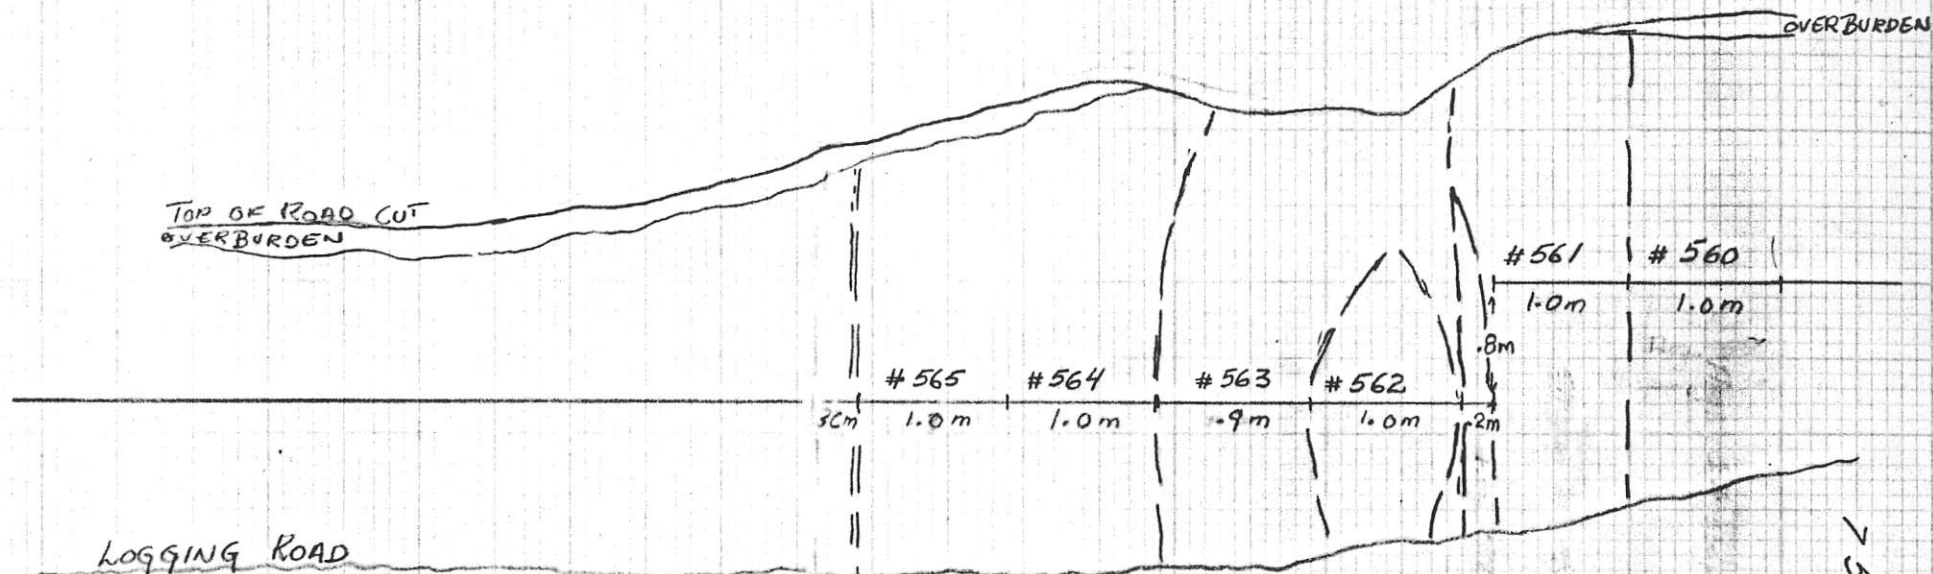

€ March/85	Expen.	\$150,000	Earn. int	40%
June/85	"	\$100,000	Earn. int.	45%

They probably had difficulty to getting partners so they have changed the terms, they might even change the terms more. They want to be operator because they think that their experience on massive sulphide deposits will benefit this property.
