Dear Gordon;

Please find enclosed a copy of the plotted geochem/assay data for the Tamihi Creek area. I'm sorry it took so long but our priorities changed rapidly over the last 18 months and I've been working on other things. As a result this work has been gathering dust on a corner of my desk - a fate it doesn't really deserve.

As for the geology, we used Monger's map together with the Cominco/Great Plains' work and didn't really spend enough time in there to prove or refute anything. It's a complex area that needs a lot of effort - and just a bit more outcrop in key areas!

Good luck with the prospecting.

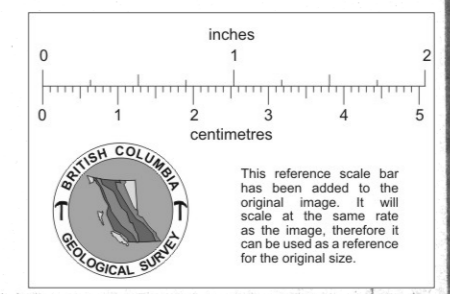

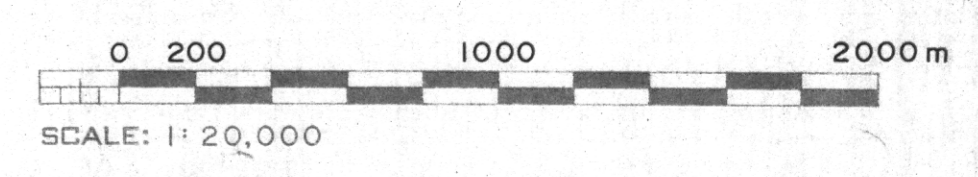

Yours truly,

Ian D. Pirie
Project Geologist
