AGC AMERICAS GOLD CORP

AGA;AGCFF 161.7 Feet of .141 Gold For Hole JD96 187

Symbol: AGA AGCFF

12Sep96 Market News Publishing Inc. 96/09/12 No:0004

AGC AMERICAS GOLD CORP. ("AGA-V;AGCFF-L")
- 161.7 Feet of .141 Gold For Hole JD96-187

Henry Meyer, President of AGC Americas Gold Corp., wishes to announce further results from its 1996 drill program on its 100% owned JD property located in north-central British Columbia, located approximately 40 miles north of Royal Oak's Kemess Mine.

Holes JD-96-186 and JD96-187 tested the southern extension of the central Finn zone and confirmed the grade continuity over excellent widths

Results from holes JD96-186 and JD96-187 are as follows:

Hole 3	Interval (meters)	Au oz/ton (Gold)	Ag oz/ton (Silver)	Width (meters)	Width (feet)
JD96-186	9.0 - 36.0	0.113	0.43	27.0	89.1
	including	0.224	0.25	3.0	9.9
	and	0.316	0.32	1.0	3.3
	including	0.255	0.55	6.0	19.8
	and	0.861	1.54	1.0	3.3
JD96-187	5.0 - 54.0	0.141	0.41	49.0	161.7
	including	0.233	0.23	3.0	9.9
	including	0.235	1.78	1.0	3.3
	including	0.285	0.16	4.0	13.2
	including	0.488	0.53	6.0	19.8

Holes JD96-186 and JD96-187 are indicative of the significant increase in width and subsequent bulk tonnage potential as reported in our news release dated September 10, 1996 with the exploration target a much larger porphyry style deposit in the order of 30 million tons.

Further assay results will be released as they are received.
