RE: BARKER CLAIMS + 1996 PROGRAM PROGRESS

Mineral Claims Data

I currently have claims data, based mainly on the July printout provided, for 205 2-post claims. 17 placer claims and 141 4-post claims (2298 units). Not all of these are on microfiche claim maps (ie - Comet claims) and you have advised that there are additional claims, some of which have not yet been recorded. Examples of other gaps, according to property outline as provided by Roy Lammle, may include new staking in the Ishkloo and Sellers Creeks areas.

Have a look at the enclosed, a modification of which will be included as an appendix. I think I have been able to sort out the Aurizon and Tintina joint venture claims but please check this.

Since our conversation this morning, Roy Lammle called me and we have discussed his preparataion of a number of page-size claim maps at a scale similar to the diagram of the ACE claims contained in his reports of 1995 work. He is aware that he will be getting some additional information from you early in the week.

1996 Program

Lammle's reports provide more than enough pertaining to previous work and I have just had a long conversation with Bruce regarding some much needed data (including E-Scan data) which he will send by courier later today. I don't think it's necessary to go into great detail at this juncture (the report will require several revisions I'm sure) but I should include highlights at least for the 1996 program.

You will be able to fill me in later on this week regarding the nature, extent (approximation of samples collected, line-km of geophysics, etc.) and distribution of 1996 work plus capsule comments of results obtained to date. You will also be able to give me an idea of the nature and extent of work done on the Tintina and Aurizon JV ground.

As noted, I have had the benefit of some of Tryg Hoy's thoughts and will also talk to Vic Preto.

I hope we can get together for a few hours next week.

Nick Carter
