

HOMATHKO GOLD

Aug. 1/83

El. 7320' - above and north
of old workings. 830445

Andesite schist - Sch. 330/25N
4" QV in plane of
schistosity - Photo

Upper Workings - at 7180'

QV - 6" - 30" wide.

- in plane of schistosity 350/30W
- banded. - Photo.

At base of cut - rolls to 4' width.

Banded - asp, po, minor qtz
- sericite in fractures

Sample - 30" - MC-82-H-1

To north and south

- Narrow - up to 6" QV
in plane of schistosity
discontinuous.

Portal - 7070' d.

A.P. massive andesite
- fragmental - flattened
Lags.

South Drift

20' W of face

Chip across strivings
north sulfides in schist
NC-82-11-2

15' N of X-cut

Vein - 24" wide outback
Abundant sulfides.
NC-82-11-3

Fault Zone - W-X-C

Random chips of NW
schist
NC-82-11-4

Face of N. Duff.

22" wide QV in schist

steeply dipping

Chip Sample NE-BWH-5

El. 7030' - below adit.

2 ft. white QV @ 045/45N

Some carbonate - minor
sulfides.

NE and below adit.

10-15' cgl. lens - rusty

- intercalated red packag

- schist matrix, flattened

2-5" cobbles in plane

of schistosity.

Specimen of cgl. matrix.

Old Camp - El. 6330'
