RE: ED PROPERTY - FORAN MINING

Ron:

Herewith results for 13 samples collected from four of seven holes drilled in 1996. DH-1-96 was drilled to test the sulphide zone on the northern or TS claims; hole numbers 7, 6 and 4 were drilled to test EM anomalies in the southwestern part of the ED#1 claim. Sample sequence was predicated on the availability of core during a trip to the property in late November of 1996.

Sample locations and intervals are as follows:

<u>Hole No.</u>	<u>Sample</u>	<u>Interval(ft.)</u>
DH-7-96	1	213.0 - 218.0
	2	218.0 - 219.5
	3	219.5 - 223.0
	4	223.0 - 227.0
	5	227.0 - 230.0
	6	240.0 - 244.0
	7	260.5 - 266.5
DH-6-96	8	223.0 - 224.0
DH-1-96	9	306.0 - 316.0
	10	316.0 - 326.0
DH-4-96	11	455.0 - 456.0
	12	466.0 - 470.0
	13	117.0 - 121.0

I hope this is of some use to you -
