TRAVERSE

REPORT

FOR

JUNE 28 / 81

BY

S. GOERTZ

June 28/81

S. Goertz:

Traverse: S. on Noth Cr. to
Yeth Cr.

Weather: Cloudy.

Sample	Type	Width	Veloc.	Grain	Colour
SGT 1-204	Soil				
205	Soil				
206	Soil				
207	Soil				
208	Soil				
209	Silt	1m	3	Fine	Grey
210	Soil				
211	Silt	0.5m	2	Fine	Grey.

Taken near gossam. Poor S.D. in this area.

Horizon	Organic	Depth	Colour	Slope
A-B	5-10%	10cm	Brown	Steep
"	"	"	G. Brown	Moel
B	5%	"	R. Brown	"
C	No	"	Grey	"
"	"	"	"	Steep
C area	5%	10cm	G. Brown	Steep

Sample	Type	Width	Veloc.	Grain	Colour
SGT1-212	Soil				

Talus slope. Poor S.D. "B" horizon very.
213 Soil
Bottom of canyon. S.D. poor.

Summary:

Today Mike Thicke and I traversed S. on Noth Cr. to where it joined with Yeth Cr. Soils were taken every 300m on the E. bank. Two siffs were taken from tributary streams. A Gossamorous canyon was encountered about $\frac{2}{3}$ -way down the creek that contained mostly Inklin seeds, with young intrusions and possible volcanics.

Horizon	Organic	Depth	Colour	Slope.
B.	5-10%	10cm	Brown	Steep.
Small amount.				
B-C.	No	20cm	Brown	Steep.
Possibly old talus slopes
