

840624

June 29 Steep Creek.

On traverse with K. Shannon.  
Spent first half of day completing  
staking of Goat Group. We  
encountered volcanic porphyry &  
Inblin Rock. A large portion  
of the Traverse was through  
Dossin area. Travel was pretty  
good but we moved fairly  
fast due to lack of time.  
Pyrites were fairly common  
along traverse. Quartz was not  
noted but calcite veining  
occurred.
