1 x
→ 800 cps

trend?

faults.

75°

15-76-5/8-1

① - 3' x 4 zone

on road w. readings

→ 9000 cps in hole

in center

- ⑤ from fair little hole

qwes

200 - 1000 cps in hand
background sample

② 3" wide x 6" long

pod of quartz w.

value to 2000 cps

in hole.

qtz vein sample ⑤

qwes $\approx \frac{1000}{200}$ in hand

size
specimen

③ 2" x 10" pod.

→ 7500 cps in pit

⑤ → 1600 cps
in hand sample

(4) sample of fairly
fresh syenite
 ≈ 200 cps

* radioactivity is associated
w. pegmatitic phases.

w. qtz , carbonate &

coarse biotite. see
sample 1 for best
example

main control appears to
be N-S jointing

(5) grabs \approx every 2'
for 35' in zone
that runs ≈ 1000 cps
in place - selected
hand samples only.

$$\frac{450 \text{ cps}}{350}$$
