OVERBURDEN.

PEGMATITE } I TO I RATIO  
GNEISS }

above garnet isograd  
area is probably 50%  
pegmatite which averages  
~ 1000-1500 cps.

#16 was large float  
spalled off face directly  
above see O →

10,000 cps. on float  
boulder face.  
— identical rock

— 10,000 cps traceable  
for 6-10' along face  
— difficult access.

— estimate entire face  
averaged 2000+ cps  
10-15' high - 100' long  
also note R 17 about  
this activity
