Re: Salal Creek - Assessment Work

The following is an outline of the Salal Creek claim situation and my suggestions for maintaining the property on the basis of work carried out during 1966.

Expiry dates of the claim groups are as follows:-

<u>Claim Group</u>	<u>No. of Claims</u>	<u>Due Date</u>	<u>Existing Assess. Groups</u>
R 1 - 32	32	Nov.19/67	R, RE, & K
EEL - 39	39	May.22/67	
EE40- 47	8	Aug.24/67	
Plug 1 - 24	24	Sept. 2/67	Plug
Sal 1 - 32	32	Sept. 2/67	Sal
Win 1 - 23	23	Dec.10/66	
Toy 1 - 22	22	Dec.10/66	
Day 1 - 64	64	June 10/67	
FCEE 48 & 49	2	Oct.12/67	
	<u>246</u>		

During 1966, 6,995 feet of diamond drilling and 139 feet of packsack drilling were completed. Drilling was carried out on five claims as follows:-

<u>Claim No.</u>	<u>Diamond Drill Footage</u>	<u>Packsack Drill Footage</u>
Sal 3	934	
Plug 18	2713	51
Plug 23	1357	
EE 23	1041	
EE8	950	88

Re-grouping the claims would allow five groups each of 40 claims, i.e. a total of 200 claims, on which drill work could be applied for assessment purposes. Any assessment work outside these areas would require supporting reports, etc.

On the basis of applying assessment work only for drilling operations, at the present time, it is suggested:-

1) No work be applied to 46 of the 64 Day claims which were staked in June 1966 for protection purposes.

2) Work be applied to the five groups of 40 claims (grouped as shown in Plan 1) for the following periods (as illustrated in Plan 2).

<u>Key Claim No.</u>	<u>Group of 40</u>	<u>Assessment No. of Yrs.</u>	<u>New Date Due</u>
EE8	(Pink) EE8-15	3	May 22/70
