SUMMARY NOTES
ROCKHOUND CLAIMS

- Location: 43 km NW of Sandspit, Q.C.I.
1500 m S of Marie Lake and immediately adjacent
to the Marie property.
Good access.
- Claims: 2 old claims only, between Chevron ground to the
N and Umex ground to the S. (see sketch
attached to Bonanza notes).
- Geology: Masset volcanics?
Localized quartz-pyrite alteration.
Considered a "fringe" area to the Marie
property by Jim Christie.
There is almost certainly an old showing on the
claims, but its character is not known.
- Discussion: The known data does not justify the acquisition of
such a small piece of ground.
