

NOTES
RUMPLETILTSKIN #1 CLAIM
M466

Return to D.A.
for filing
as is

842028

Locⁿ: 2 mi SE of old Baldy Mtn.; 3 mi. E. of Shields Bay, Q.C.I.

Descr: The 4 unit designated claim is between, and on anomalous and/or structural strike with the Courte and Many Years properties.

It is characterized by low level anomalous Au values (10 to 25 ppb Au) in soils and rocks, and is underlain by a mainly sedimentary package cut by some intermediate dykes. Alteration consists of variable pyritization and/or silicification.

It is of interest that the sediments (unspecified) are of the same type as a piece of float located a half mile E. of the claim, which yielded 1400 ppb Au

Concl: The property might be of interest in consolidating the Courte - Many Years package, but under present financial circumstances the acquisition of it is not warranted.
