Summary:

Today Mike Thicke and I traversed from the headwaters of Tua Creek, N.W. to its junction with the Tatsatua R. Two siltz were taken from tributary streams on the W. side of the creek. Soils were taken every 300m on the E. side of creek. Thick brush and swarms of bugs made the going slow.

Horizon	Organic	Depth	Colour	Slope.
B.C.	5-10%	12 cm	Grey.	Mod.
B.	5-10%	15 cm	Brown	Steep.
